

LabSmith, Inc. Press Release

February 6, Livermore, CA. LabSmith Corporation, manufacturer of innovative laboratory equipment, is pleased to announce the addition of Yolanda Fintschenko, Ph.D, to their staff. Ms. Fintschenko joins LabSmith as Director of New Technologies, Marketing and Sales.

“Yolanda brings a great depth of experience in technical management and marketing to LabSmith,” said Kirsten Pace, president of LabSmith. “Her expertise in microfluidics research, microanalytical systems and food safety technology will guide our development of essential new products for research. Her experience with researchers around the globe will help LabSmith reach new markets and applications with our unique products.”

Ms. Fintschenko comes to LabSmith from her former position as Manager of Food Safety Technologies for Thermo Fisher Scientific. Prior to that post she worked for 10 years at Sandia National Laboratories in senior technical and management positions, including four years as manager of the Microfluidics Department. She holds a Ph.D. in Bioanalytical Chemistry from the University of Kansas and completed postdoctoral research at the University of Twente, Enschede, The Netherlands. She holds several patents and multiple publications in microfluidics and microanalysis.
